RE RE: Patent con call

**Unofficial**

### COVER MESSAGE

To: Cam Y T Truong / Commissioner for Patents  
From: Will Kelty / MagnaWare  
Date: April 16, 2004  
Re: Patent Application No, 09/898,171

Thank you for taking the time to speak with Jo and myself last week. Per our conversation attached is a proposal for the claims amendment. I believe this is more along the lines of what we discussed. As we discussed, would it be possible for you to look into this and see if it would be a valid claim. If so we can formally submit it.

Thank you again for all your time. As I mentioned we're a small company, and this process is new to us. We appreciate your working with us to help us through to completion.

Sincerely,

Will

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

Applicants: Joakim F. Peleus

Title: SYSTEM AND METHOD FOR NORMALIZING A RESUME

Appl. No.: 09/898,171

Filing Date: 07/03/2001

Examiner: C.Y.T. Truong

Art Unit: 2172

**AMENDMENT AND REPLY****Amended Claims****Background:**

We are processing incoming (alien) free-text documents. Our invention solves the problem of breaking down unstructured text into categorized knowledge to be used for knowledge retrieval in a computer based system.

We use a document "template" to guide us in breaking down unstructured text into categorized knowledge.

A "template" is a description of a document's language, layout, possible / probable keywords or combinations of keywords and their expected location on the incoming document. A "template" also gives a description of possible discreet content categorizations of the document.

**Listing of Claims:**

- a) The use of database of categorization "templates". For each expected alien document type there is an appropriate "template".
- b) The use of lexical and content analysis (pre-processing) to determine the language of the alien document.
- c) The use of lexical and content analysis (pre-processing) to determine the selection of an appropriate template to be used to process the incoming alien free-text document.
- d) The use of a default generic "template" when our lexical and content analysis (under claim c)) fails to determine the category (hence the template choice) of the alien document.

Re: Patent Application No, 09/898,171

Hello Cam,

I just wanted to follow up to see if you had received our previous fax, and  
had a chance to look at the additional information?

Sincerely,

Will
